WorkCentre® 3025/3215/3225

Phaser 3020/3052/3260

General Release 3.50.01.1x

Release Date: September 2015

Software Release Details

Products	System Software	Main Controller Board (MCB)	Image Output Terminal (IOT)	Network Controller
WC 3215/3225	V3.50.01.10	V3.50.01.08	V1.01.07 12-10-2014	V6.01.12
Phaser 3052/3260	V3.50.01.11	V3.50.01.11	V1.01.07 12-10-2014	V6.01.14
WC 3025BI	V3.50.01.10	V3.50.01.10	V1.01.07 1-16-2014	V6.01.13
WC 3025NI	V3.50.01.10	V3.50.01.10	V1.01.07 1-16-2014	V6.01.13
Phaser 3020	V3.50.01.10	V3.50.01.10	V1.01.07 1-16-2014	V6.01.13

IMPORTANT- Read before installing Firmware

This Firmware includes mitigation of the Poodle and FREAK vulnerabilities by implementing a change to default SSL to off and use TLS only. To learn more go to Xerox Security Information page <http://www.xerox.com/information-security/enus.html>.

The "TLS Only" or "Only TLS" checkbox will be enabled by default and will support TLS versions 1.2, 1.1 and 1.0.

- When choosing the "TLS Only" or "Only TLS" checkbox, all SSL only connections will no longer work.
- When enabling the "Require SSL v3" option, the device will use SSLv3 only to establish a connection.
- The 2 features, "TLS Only" and "Require SSL v3" are mutually exclusive of one another, if one is checked the other must be unchecked. Also, if both features are off (unchecked), the device will use SSL (all versions) and TLS (all versions) simultaneously if needed.

Purpose

- Mitigation of the Poodle and Freak vulnerabilities

Installation Instructions

Manual upgrade using CentreWare Internet Services

This section provides instructions to upgrade machine software over the network via Xerox CentreWare Internet Services (CWIS).

Process Checklist

Before starting the procedure, please ensure that the following items are available and / or the tasks have been performed:

1. The Software Upgrade file (Firmware file) is obtained from the Xerox web site: <http://www.support.xerox.com/>, for “Search or choose:” enter the correct model number for your device [either 3025, 3215, 3225, 3020, 3052 or 3260]. Select the correct model from the list that will be displayed, then click “Drivers and Downloads” to access the file.

IMPORTANT: It is important to obtain the correct upgrade file for your particular model of machine.

2. Completely unzip the file to a known location on your computer. Do not leave the file in the zip folder.
3. Print a Configuration Report.
4. Ensure that the machine is online before continuing. TCP/IP and HTTP protocols must be enabled on the machine so that the machine’s web page can be accessed. Obtain the *IP Address* of the machine you want to upgrade.

Procedure

1. Open a web browser on your computer (Internet Explorer, Chrome, Safari, etc.)
2. Enter the IP Address of the machine in the Address bar and select Enter.
3. If prompted, enter the Administrator User Name (admin) and Password (1111), and select Login.
4. Select Properties.
5. In Security on the left hand side, select the System Security link.
6. Select the Feature Management link in the directory tree.
7. If it is unchecked, select the Firmware Upgrade Enable box.
8. Click Apply to save the changes.
9. Select the Support tab.
10. In the Firmware Upgrade link click the Upgrade Wizard button.
11. The Firmware Upgrade Wizard screen appears. In the Firmware File area:
 - a. Select Browse.
 - b. Locate and select the software upgrade .hd file unzipped earlier.
 - c. Select Open.
12. Select Next. The firmware will now be verified and display information about the upgrade file.
13. Select Next to continue. The upgrade should take less than 10 minutes unless there are network issues.
14. Once the machine has completed the upgrade it will reboot automatically. The Configuration Report will print (if enabled). Compare the report to the one printed earlier to verify that the software level has changed.
